UNIVERSITY STATISTICAL ABSTRACT

1982

Institutional Research and Planning
University of North Florida

FOREWORD

The 1982 University Statistical Abstract (USA) is a collection of informational reports presented in one single source. As a result of the strategic planning process, the USA was conceived. Serving as a primary planning source document, the USA contains information spanning many University functions:

Students
Employees
Library
Physical Facilities
Budget

The function of this document is to serve the wide-spread informational needs associated with Institutional, College, Division and Unit planning, program review and institutional research.

The primary sources of data used to generate the reports are the standard format computer data files which each university must produce and provide to the Board of Regents. Additional information was acquired as needed from departmental records, Federal compliance reports, operating budgets and financial reports. Most reports depicting trend data begin with Fall, 1978, which earmarked the State University System conversion to the Common Course Numbering System. Also, please note that in Fall, 1980, the State University System converted from a quarter system to a semester system.

Suggestions concerning the format and content are most welcome so that this document can best serve the planning needs of our faculty, staff and students.
