FOREWORD

The 1987 University Statistical Abstract (USA) is a collection of informational reports presented in one single source. Serving as a primary planning reference document, the USA contains information spanning many University functions:

Students
Employees
Budget
Other Resources

The function of this document is to serve the wide-spread informational needs associated with Institutional, College, Division and Unit planning, program review and institutional research. It should be noted that this document is intended to address a wide range of informational needs. Any need for more specific data should be forwarded to the Office of Institutional Research.

The primary sources of data used to generate the reports are the standard format computer data files which each university must produce and provide to the Board of Regents. Additional information was acquired as needed from departmental records, Federal compliance reports, operating budgets and financial reports. Most reports depicting trend data begin with Fall, 1978, which earmarked the State University System conversion to the Common Course Numbering System. Other important milestones include conversion from a quarter system to a semester system in Fall 1981, and the authorization and addition of a freshman and sophomore program in Fall 1984.

Suggestions concerning the format and content are most welcome so that this document can best serve the planning needs of our faculty, staff and students.
