FOREWORD

The 1988 University Statistical Abstract (USA) is a collection of informational reports presented in one single source. Serving as a primary planning reference, the USA contains information spanning many University functions:

Students
Employees
Budget
Other Resources

The function of this document is to serve the wide-spread informational needs associated with Institutional, College, Division, and Unit planning, program review and institutional research. It should be noted that this document is intended to address a wide range of informational needs. Any need for more specific data should be forwarded to the Office of Institutional Research.

The primary source of data used to generate the reports are the standard format computer data files which each University must produce and provide to the Board of Regents. Additional information was acquired as needed from departmental records, Federal compliance reports, operating budgets, and financial reports. Most reports depicting trend data begin with Fall 1980 which marked conversion from a quarter system to a semester system. Other breaks in the continuity of the data include the addition of a freshman and sophomore program in Fall, 1984, and the establishment of the College of Health, incorporating the Division of Nursing and the College of Education's Department of Allied Health in the Summer of 1987. Also in the Summer of 1987, the Division of Technologies was incorporated into the Department of Vocational and Technical Education within the College of Education and the Department of Transportation and Logistics and the Department of Business Administration were merged to form the Department of Management, Marketing and Logistics in the College of Business Administration.

Suggestions concerning the format and content are most welcome so that this document can best serve the planning needs of our faculty, staff and students.
