CONSTRUCTION PROGRESS

The speed with which the campus buildings are going up is nothing short of amazing. Ground has been broken and the area cleared and leveled for two more buildings. These smaller structures are the central utilities plant and the physical plant service building.

A third lake on the campus grounds is now being worked on just south of the library building. One lake at the rear of the buildings is completed and the 20-acre lake with substantial island should be finished by Houdaille-Duval-Wright in the near future with an approximate depth of eight feet.
