FOREWORD

The 1991 University Statistical Abstract (USA) is a collection of informational reports presented in one single source. Serving as a primary planning reference, the USA contains information spanning many University functions:

Students
Employees
Budget
Other Resources

The function of this document is to serve the wide-spread informational needs associated with Institutional, College, Division, and Unit planning, program review and institutional research. It should be noted that this document is intended to address a wide range of informational needs. Any need for more specific data should be forwarded to the Office of Institutional Research.

The primary source of data used to generate the reports are the standard format computer data files which each University must produce and provide to the Board of Regents. Additional information was acquired as needed from departmental records, Federal compliance reports, operating budgets, and financial reports. Breaks in the continuity of the data include the addition of a freshman and sophomore program in Fall, 1984, and the establishment of the College of Health, incorporating the Division of Nursing and the College of Education's Department of Allied Health in the Summer of 1987. Also in the Summer of 1987, the Division of Technologies was incorporated into the Department of Vocational and Technical Education within the College of Education and the Department of Transportation and Logistics and the Department of Business Administration were merged to form the Department of Management, Marketing and Logistics in the College of Business Administration. In 1989, within the College of Arts & Sciences, programs in the Departments of Fine Arts and Language and Literature were reorganized, forming the new Departments of Music, Communications and Visual Arts, and Language and Literature. Also in 1989, the Division of Computer and Information Sciences became the College of Computer & Information Sciences.

For 1991, the entire collection of tables that make up the Abstract has been reorganized. Few reports have actually changed, however, the reports have been organized into sections that share a common perspective. In particular, a distinction has been drawn between reports that provide totals organized by academic department. In the Student Enrollment Section, student credit hours and F.T.E. are reported by the student's major, and placed into the academic department that offers that major. In the Academic Productivity Section, hours and F.T.E. are totalled by course, and placed into the department that offers that course. To avoid any possibility of confusion, reports have been separated into the two sections according to the manner in which totals are taken.

Minor changes have been made to many reports to improve their clarity and utility. In several instances, we have increased the detail and reduced the number of years shown on a page. To facilitate matching reports with equivalent information from previous Abstracts, an Appendix provides tables to index reports by number to and from the old system.

Suggestions concerning the format and content are most welcome so that this document can best serve the planning needs of our faculty, staff and students.
