GENERAL INFORMATION ABOUT

JACKSONVILLE—ST. JOHNS RIVER BRIDGE

AT JACKSONVILLE, FLA.

Plans and specifications prepared by Harrington, Howard and Ash, Consulting Engineers, 1012 Baltimore Avenue, Kansas City, Mo., which firm also supervised the construction of this bridge. Mr. E. R. Needles, Resident Engineer.

Contractors for sub-structure—Missouri Valley Bridge and Iron Company, Leavenworth, Kansas.

Contractors for super-structure—Bethlehem Steel Bridge Corporation, Steelton, Pennsylvania.

Work on bridge started November 15, 1919.

Bridge finished and opened to public July 1, 1921.

Length of north approach	470 feet
Length of south approach	900 feet
Length of bridge over water	2,370 feet
Total length of bridge over all	3,740 feet
Width of roadway between curbs	30 feet
Two 7-foot sidewalks (one on each side)	14 feet
Total width of bridge over all	44 feet

Lift span towers are 165 feet above their supporting piers, or 222 feet above the water.

Floor of lift span is 65 feet above the water in the main channel of river, leaving a vertical clearance under bridge when closed of 57 feet.

Lift span can be raised to a height so as to give a vertical clearance under bridge of 165 feet.

The above traffic report does not include number of passengers using Bridge on Street cars, because of the fact that the South Jacksonville Municipal Street Railway is permitted by law to operate street cars over the bridge without payment of tolls. Also it does not include number of passengers using bridge in automobiles having bridge permit tags.
