Since June, 1930, Road Bonds—Issue of 1923 and Bridge Bonds—Issue of 1923, have been administered by the State Board of Administration at Tallahassee, Florida, where all records in connection with these issues are kept. Various bonds of each of these two issues have been redeemed prior to maturity. Additional bonds are being currently redeemed prior to maturity. The above schedules list the complete sequence of all principal and interest maturities for the entire issues. It is therefore necessary to consider all bonds which have been redeemed prior to maturity before calculating any future principal and interest maturities.
