STUDENT SURVEY REVEALING

The UNF's division of physical facilities has a survey of our applicants underway and a picture of the needs and wants of the UNF charter class is beginning to emerge.

Hilton Meadows, director of physical facilities and designer of the survey, feels that the answers may contradict some assumptions made earlier concerning the UNF student.

Unusually high interest in recreational activities was indicated by a majority of respondents. Most students said they would prefer to make use of the campus facilities for recreation, even if facilities were available near their homes.

Tennis was the sport in which most would like to participate, with an arts-crafts-hobby shop taking second place.

Approximately half of the respondents to date were single, while 42% were married with children under 10 years of age. A great majority of the students responding were between the ages of 19 and 30.

Questions regarding the students' means of transportation revealed a surprisingly high number owning or planning to use their own cars. These car owners plan to drive them singly to campus. The majority probably won't use bus service or car pools.

Nearly 500 students have responded to the survey to date, and the data is still coming in. More surprises may well develop from the responses received when the survey is complete. Meanwhile Mr. Meadows is gaining information that will help his office and the whole University serve our students better.

HANG IN THERE!

Roses to the girls at the switchboard for keeping their cool through the screaming and the nasty comments and the impatiently flickering lights! You've handled it all far more diplomatically than could be expected. Relief is already apparent. Two extra lines have been connected and the two which were down last week have been repaired, amounting to almost a 50% increase in service.

Thanks Dianne Wilson, Kay Wooten and Dianna Robertson for your deftness, and your patience with us!

PARKING APLENTY
AT UNF

Hilton Meadows, director of physical facilities, says students and staff will have plenty of parking come September and a large measure of the credit should go to UNF staff engineers Tom Bostwick and Larry Davis. They designed, under a tight deadline, one of the lots to be built by Houdaille-Duval-Wright.

Altogether, some 1,750 parking spaces will be available. H-D-W was low bidder on two lots this week containing 1,440 spaces, 640 of which were designed by Messrs. Bostwick and Davis. The balance were designed by the Department of Transportation. H-D-W is underway on 310 spaces bid earlier.
