### **The University of North Florida**

The University of North Florida officially came into existence in 1965 when the Florida Legislature authorized the creation of a state university or branch of an existing state university in Jacksonville to meet the higher educational needs of the northeast Florida region. The Board of Regents of the State University System of Florida recognized that these needs could best be met by an institution which offered junior, senior, and college graduate level programs, drawing its students primarily from the area's junior colleges.

In 1969, a 1,000-acre campus site midway between the beaches and downtown Jacksonville was donated by the City of Jacksonville and area landowners. In that same year, Dr. Thomas G. Carpenter was appointed President of the University. Guided by President Carpenter and a small staff, continued planning led to the development of programs, the selection of administrative staff members, and the appointment of departmental chairpersons and faculty members. During the summer of 1972, the faculty reported for duty and, on October 2,

more than 2,000 students began classes on the newly opened campus.

The University's Charter Class students arrived on a campus consisting of four major buildings. During subsequent years, additional buildings were added and occupied bringing the current total to nine.

Significant in the planning and construction of campus facilities has been UNF's dedication to the preservation of the environment in which it finds itself. The campus harbors numerous native plant and animal lifeforms, and every effort has been made to avoid disturbing the natural ecological balance that exists. To this end, the UNF campus has been designated as a wildlife preserve and bird sanctuary.

The University of North Florida is an institution committed to teaching and regards classroom instruction as the most important instrument in the educational process. The faculty has been appointed after exhaustive search to insure that only the most qualified candidates are brought to the University. Other learning experiences are incorporated into the academic programs to supplement and complement the classroom experience, such as the unique Leonardo da Vinci Venture Studies program which permits students to pursue liberal arts courses while specializing for a career.

The planning and work invested in the building of a strong, new University in north-east Florida was rewarded in December 1974, when the Southern Association of Colleges and Schools granted full academic accreditation to the University of North Florida at both the undergraduate and graduate levels. As far as anyone knows, UNF is the first university in history to obtain dual accreditation simultaneously at both the undergraduate and graduate levels from the SACS.

More recently, the College of Business Administration was accorded accreditation at the undergraduate level by the American Association of Collegiate Schools of Business, the first upper-level program to be so honored. Within the business college, the Department of Transportation and Logistics has been designated as one of the first five

State University System "Programs of Distinction" as a direct result of the Florida Legislature's emphasis on programs to serve the needs of the state.

The University also is committed to serving all segments of the state's population, while recognizing its primary geographic area of responsibility. It has not confined itself to a purely academic mission, but has moved out into the community to participate in the solution of problems confronting the community and its citizenry.

Totally resolved to the ideal of equal opportunity, the University enrolls and employs qualified persons regardless of race, creed, sex, age, limitation, or natural origin.

### **The Symbol and Seal**

Two ancient devices - the circle and the compass rose - have been adopted and modified in creating a graphic symbol for the University of North Florida. The compass rose, long a direction-finding device for mariners, here symbolizes the University's role in providing direction for lives. The placement of the compass rose in the upper northeast quadrant of the circle describes the institution's upper division character and its location in the northeast of Florida. The circle itself signifies the community which the University is dedicated to serve.

The symbol was inspired by the University of North Florida seal, designed under the direction of former President Thomas G. Carpenter. The seal is used on formal documents, such as each graduate's diploma. The symbol, as a simpler representation of the seal, is used in the University's publications and other communicative devices.

This public document was printed at a cost of \$97.98 or 10 cents per copy, to provide program information and a listing of 1980 Summer Quarter graduates for commencement ceremonies at UNF.
