1984 Distinguished Professor

DR. LEONARD J. LIPKIN

Professor of Mathematical Sciences

Dr. Leonard J. Lipkin was born in Peoria, Illinois in 1938. Following his graduation from Peoria Central High School, he attended Oberlin College, where he studied clarinet under George Waln and Kenneth Moore and was active in the college's Symphony Band, Wind Ensemble, Collegiate Symphony and a number of chamber groups. He also earned three athletic letters as a member of the Oberlin golf team and served as president of the Jewish Student Congregation.

Graduating from Oberlin with his A.B. degree, *cum laude*, Dr. Lipkin subsequently attended the University of Michigan, where he earned both master of arts and doctor of philosophy degrees. While at Michigan, he began his teaching career as a teaching fellow and lecturer.

Following his studies at the University of Michigan, Dr. Lipkin joined the faculty of the University of California at Berkeley as an instructor. He subsequently went on to teach at the University of Kansas as an assistant professor of mathematics and joined the University of North Florida faculty in September 1972 as an associate professor. Dr. Lipkin subsequently earned promotion to his current academic rank of professor of mathematical sciences.

The 1984 Distinguished Professor holds memberships in the American Mathematical Society, Mathematical Association of America, Society for Industrial and Applied Mathematics, and the Florida Council of Teachers of Mathematics. He also holds membership in two honorary societies, Sigma Xi and Phi Kappa Phi.

At UNF, Professor Lipkin has been active on numerous University, College of Arts and Sciences, and Faculty Association Committees. He served as interim vice president of the Faculty Association in 1975, as president of the Arts and Sciences faculty during 1975-76 and 1979-80, and was a member of both the Presidential Search Committee and the UNF Press Editorial Board.

Within the Department of Mathematical Sciences, Dr. Lipkin served as acting chairperson during 1983 and has served as assistant chairman since 1982. He organized the University's first student mathematics club in 1972 and has served as faculty advisor for the Mathematics/Statistics Club since 1982. He also has coordinated many departmental colloquia and, as coordinator for lecturers, has brought to the campus a number of off-campus speakers.

Dr. Lipkin continues to actively pursue research opportunities and currently is preparing a proposal to be presented to the National Science Foundation for an institute for excellent teachers of mathematics. He also is a member of the UNF grant committee seeking a program or center of excellence in mathematics, computer and science education at UNF.

Honorary Degree Recipient

SAMUEL A. GRIMES

Doctor of Science

Mr. Samuel A. Grimes, who celebrates his 78th birthday today, moved to Jacksonville in 1917. Since his youth, he has been an avid student of ornithology and, despite his lack of formal college training, has made many significant contributions to the study of birds. His earliest article on birds appeared in the *Florida Naturalist* in 1928 and, in 1929, he began the Jacksonville Christmas bird count as sole observer, tracking various avian species by bicycle.

He blended his interest in ornithology with his ability as a photographer to become a pioneer in bird photography. His work continues to influence this photographic speciality, and serious students will find his photographs scattered throughout the prestigious *Bent's* "Life Histories" series, the *Encyclopedia Britannica*, the *World Book Encyclopedia*, and the *National Geographic Magazine*. His work also is reflected in most North American bird journals and many state bird books.

Mr. Grimes has the distinction of seeing his photograph of a Roseate Spoonbill with young published as the first color photograph ever printed in *Bird Lore* in 1937. In 1958, he produced his own book, "*An Album of Southern Birds*," a work which is recognized today as a masterwork in Southern Ornithology and which serves as a model and guide for naturalists who have followed his leadership in the field.

For more than a decade, Mr. Grimes' photographs provided most of the covers for the *Florida Naturalist* until the magazine changed its format in the early 1960s.

Field work in conjunction with his photographic interests resulted in many important records listed in Sprunt's "*Florida Bird Life*." With Glen Chandler, he found the first known Cattle Egret nest in North America at Kings Bay Rookery, near Lake Okeechobee, on May 5, 1953.

Although not possessing degrees in the field, he was elected to membership in the American Ornithologists' Union in 1951 because of his contributions to ornithology. This was a singular honor, since the Union includes among its membership those who hold the highest academic credentials in the field. He also has enjoyed a long association with the National Audubon Society and its Florida Chapter, and is a charter member of the Florida Ornithological Society.

In recent years, his interest in the songs of the Mockingbird resulted in a recording album, "*The Vocally Versatile Mockingbird*." Hours of painstaking research, field work and careful editing are reflected in this instructive work.
