or Glossy Copper Bronze.

MAXWELL Copper-Alloy Burial Products are constructed of the famous Copper-Alloy Steel—a purified steel and copper mixed together—which possesses high rust-resisting qualities that 'Defies Decay'.

MAXWELL products are thoroughly tested and inspected through each manufacturing process to positively determine their water and air tight guarantees.

Locking features, of our own design, are easy and positive in operation. Handles and Fixtures are so welded from the outside that there are no holes through the structure of the vaults.

The high reputation of MAXWELL products has been established as a result of their undeniable superiority; their value proved in service. The increased demand has not been through extensive advertising campaigns, but from recommendations of our purchasers, who by experience have convinced themselves of their enduring quality.

Manufactured and Guaranteed by Maxwell Steel Vault Co., Oneida, N. Y.
